*Election/Restriction*

*Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-28, drawn to compositions, classified in class 424, subclass 489.
- II. Claims 29-66, drawn to method of making a suspension, classified in class 514, subclass 937.
- III. Claims 67-74, drawn to method of making a solution, classified in class 424, subclass 455.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the nanoparticles of beclomethasone dipropionate and a surface modifier can be made by materially other methods, such as spray drying. Also the method of contacting particles with stabilizers and grinding can be used to make materially different compositions.

Inventions I and III are related as product and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the

Art Unit: 1616

nanoparticles of beclomethasone dipropionate and a surface modifier can be made by materially other methods, such as spray drying. Also the method of dissolving active agents in an aqueous base, adding the surface modifier and recovering the particles can be used to make materially different compositions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

***Election***

Claims 10-74 are generic to a plurality of disclosed patentably distinct species comprising:

- 1) Aqueous dispersions or dry compositions (claims 20 and 23).

- 2) Various types of surface modifiers (e.g. claims 25-28 and 63-66).
- 3) Various types of polymeric resins (e.g. claims 45-48).

Applicant is required under 35 U.S.C. 121 to elect a **single** disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Michele Simkin on 6/29/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1616

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mina Haghighatian whose telephone number is 571-272-0615. The examiner can normally be reached on core office hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary L. Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
